List your immediate health concerns?

What are your therapy goals?

HyperMED NeuroRecovery - dedicated to improving the quality of life of individuals suffering neurodegenerative disorders through innovative clinical applications and research. HyperMED Protocols include Hyperbaric Oxygenation (HBOT), Adult and Pediatric Lokomat modules (Australia's first Robotic Gait Assisted Walking - 2006), Median Nerve Stimulation, Neuro-Acupuncture, Whole Body Vibration, immune stimulating supplements and emerging stem cell related applications. More detailed information is available at www.hypermed.com.au

HyperMED NeuroRecovery does not provide a guaranteed outcome – it is our hope that improved functionality will occur as a result of this protocol.

Please ensure that you bring copies of all past medical reports, tests and investigations.
