

OXY-SPORTS

NAC

[100% N-Acetylcysteine] Neuroprotection | Glutathione stimulant

- NAC is a powerful antioxidant used as both a glutathione substitute and indirectly as a precursor for glutathione (neurotransmitter)
- Combined with hyperbaric oxygen therapy (HBOT) NAC increases fibroblast proliferation promoting musculoskeletal and ligament repair
- NAC causes vasodilatation; benefit in acute myocardial infarction and other chronic ischemic disorders
- Neuro-protective effect preventing trauma-induced oxidative brain tissue damage
- Promotes and protects Blood Brain Barrier (BBB) function
- Reduces chronic BBB inflammation and swelling causing hypoxia
- NAC results in a reduction of body weights and in visceral fat tissues (adipogenesis). NAC may be useful as an anti-obesity drug or supplement
- NAC enhance T cell function in HIV infected patients and other chronic immunosuppressive disorders
- NAC reduces the inflammatory imbalances associated with Cystic Fibrosis and other obstructive airways disorders and chronic respiratory infections
- NAC is widely used as an antioxidant, but also protects pancreatic beta cells in type 1 diabetes
- Methylsulphonylmethane (MSM) is a strong antioxidant of the methionine cycle; combined with N-acetyl cysteine providing strong neuroprotection promoting recovery and stabilization

MSM

[100% Methylsulphonylmethane] Chronic Pain and Inflammation

MSM is an organic sulfur compound; it is a white crystalline substance with a bitter taste. MSM provides in excess of 85% of sulfur found in all living organisms. Sulfur is required for the formation of all connective tissue structures. MSM is effective in treating and range of disorders from arthritis to chronic inflammatory disorders. MSM is non-toxic and safely ingested. Derivatives of MSM include methionine, glutamine, cysteine and cysteine which are powerful precursors to Glutathione production in the body.

- Strong antioxidant properties
- Neuroprotective when combined with Rehab Plus and N-acetylcysteine (NAC)
- Reduces painful arthritis inflammation
- Promotes circulation essential for the healing process
- Reduces muscle spasms
- Reduces and softens scar formation
- Slow the progression of degenerative arthritis
- Promotes soft tissue and cartilage repair
- Promotes joint flexibility reduces stiffness
- Reduces symptoms associated with irritable bowel
- Relieves constipation and promotes diuretic balance
- Increases energy
- Relief of numerous allergy symptoms
- Immune stimulation – anti parasitic, anti viral, anti bacterial
- Assist liver function and detoxification
- Promotes healthy skin, hair and nails

REHAB PLUS

[High Potency Amino Acids, Essential Vitamins and Minerals] Performance | Rapid Recovery | Rehabilitation

Rehab Plus is one of most effective products designed for individuals ranging from high level athletes to those suffering complex degenerative neurological illness. Rehab Plus is high performance and will assist metabolic recovery, reduce organ toxicity, muscle fatigue and promote circulatory function hastening performance and recovery.

Rehab Plus is recommended in conjunction with other OXY-Sports products including MSM (Methylsulphonylmethane) or NAC (N-Acetylcysteine). Ingredients: Typical analysis per 1-gram (½ teaspoon is equivalent to 2.5 grams active product).

Vitamins

Thiamine (B1) 6.5mg
Niacinamide (B3) 6.5mg
Calcium Pantothenate (B5) 4.5mg
Riboflavin (B2) 3mg
Pyridoxine (B6) 1.4mg

Folic Acid .695mg
Choline .265mg
Nicotinic Acid (B3) .028mg
Pantothenic Acid (B5) .0075mg

Amino Acids

Arganine 7.01mg
Leucine 6.81mg
Lysine 6.2mg
Valine 5.39mg
Glycine 4.58mg
Phenylalanine 4.39mg
Isoleucine 4.18mg
Glutamic Acid 3.92mg
Threonine 3.83mg

Histidine 3.59mg
Aspartic Acid 3.19mg
Alanine 2.33mg
Serine 1.73mg
Cystine 1.83mg
Methionine 1.63mg
Tyrosine 1.33mg
Proline .99mg
Tryptophane .944mg

Minerals

Phosphorous 3mg
Potassium 1.24mg
Calcium .938mg
Sodium .924mg
Magnesium .492mg

Iron .039mg
Manganese .021mg
Zinc .016mg
Cobalt .015mg
Copper .010mg
